

# Mr. BINMAN

SUSTAINABILITY IS AT OUR CORE

JANUARY 2024

## Overview

### About Profile Developments trading as Palladio

Profile Developments is dedicated to enhancing sustainability for its customers by implementing effective waste diversion practices. The company actively redirects all waste away from landfills, adopting innovative measures to promote a circular economy.

Our recycling partner, Mr. Binman, encourages higher recycling rates among its customers, fostering a circular economy where materials are reused, recycled, and repurposed. This approach not only minimises the environmental impact of waste but also aligns with the broader goal of creating a more sustainable and eco-friendly waste management system for the benefit of both customers and the planet.

### About Mr Binman

Mr. Binman has been servicing the Munster area for both Commercial and Household customers for over 25 years. They pride ourselves on their levels of service, and are accredited to International Standards in Quality 9001, Environmental 14001 and Health and Safety 45001. They service over 47,000 households as well as 3,500 businesses and are an Award Winning Recycling Company.

Mr Binman are based in Limerick with a recycling facility also in Tralee Co Kerry for processing mixed dry recyclables such as plastics, metals and papers and sending them for recycling into new products.

One key initiative of the company at present involves the use of electric collection vehicles, reducing carbon emissions and contributing to a cleaner environment.

Mr. Binman Zero Emissions Collection Vehicle

# The Sustainability Project for 2024

## Objectives

Objectives	Action
<b>Zero Waste to Landfill</b>	Continuing to divert all waste from landfill. <ul style="list-style-type: none"> <li>● Reporting monthly the weights of each waste stream</li> <li>● Reporting monthly the final destination of each waste stream</li> </ul>
<b>Increased Recycling Rate</b>	Increase recycling of materials generated in production by 8% <ul style="list-style-type: none"> <li>● Reporting monthly the weights of each waste stream recycled</li> <li>● Reviewing monthly the final recycling of each material</li> </ul>
<b>Energy Consumption</b>	Review of resources employed in manufacturing and distribution <ul style="list-style-type: none"> <li>● Reporting monthly the energy consumption</li> <li>● Reviewing the amount of renewable energy used and carbon emissions.</li> </ul>
